PROFESSIONAL SUMMARY

Data Analyst transitioning from clinical and public health background, with hands-on experience in SQL, Python, and machine learning through applied analytics projects. Skilled in transforming complex datasets into actionable insights to support business and operational decision making.

RELEVANT EXPERIENCE

Master of Science in Analytics – Georgia State University Aug 2025-Dec 2026
Course work: Database Management, Machine Learning, Deep Learning, Generative AI, Predictive Analysis

Projects:

E-Commerce Growth Analysis (*Synthetic Data*) – Online Retail Sales

- **Engineered SQL queries** to analyze 170K+ web sessions and track YoY growth, revealing an 81% increase in net profit and identifying Q4 as the peak engagement window.
- **Evaluated channel efficiency and SKU performance**, discovering Source 2 yielded a 900% higher conversion rate than social media, while the flagship product generated 3.1x more revenue than competitors.
- **Developed a Databricks executive dashboard** and strategic roadmap, prompting budget reallocation toward high-converting ads and targeted investigations into a critical September return-rate spike.

Predictive Sales Forecasting & Inventory Optimization (*Synthetic Data*) – Supply Chain and Inventory Management

- **Developed a SARIMA-based ML pipeline** and automated Snowflake data pipeline, achieving a 17.8% MAPE to provide stakeholders with daily-refreshing 12-month demand projections at a 95% confidence interval.
- **Executed a SKU rationalization roadmap** identifying divisions underperforming national averages by 85%, recommending budget reallocation or segment elimination to optimize margins.
- **Created an interactive time-series dashboard** and executed a granular "Chocolate Division" deep-dive, providing per-unit stocking recommendations for top SKUs to mitigate Q4 stockouts amid global cocoa volatility.

Predictive Sales Analytics (*Synthetic Data*) – Regional Operation and Store Management

- **Built a Random Forest Regressor ML pipeline** to forecast daily sales across 1,115 retail locations, achieving a 93.5% R-Squared score and significantly outperforming baseline linear models.
- **Extracted key revenue drivers**, analyzing complex feature interactions like promotion effectiveness and competition distance to guide management on data-driven inventory and operational planning.

Certifications:

- Georgia Institute of Technology FlexStack: Python Fundamentals Certificate 2025
- Khan Academy – SQL: Querying and Managing Data 2025
- Coding for Data, Sololearn 2024

SKILLS

Python · SQL · SAS · Statistical Analysis · Risk Assessment · Outcome Analysis · HIPAA Compliance · EMR / EHR · Machine Learning · Customer Service · Medical Terminology · Clinical Documentation

ADDITIONAL EXPERIENCE

Clinical Trainee – Philadelphia College of Osteopathic Medicine – Suwanee, GA Aug 2020 – Jan 2024

- **Analytical Thinking & Data Interpretation:** Regularly assessed patient data (labs, imaging, vitals, histories) to identify patterns, extract insights, and support clinical decision-making
- **Detail-Oriented Review:** Conducted in-depth reviews of patient charts and evidence-based guidelines, honing meticulous attention to detail and precision in documentation
- **Time & Project Management:** Balanced multiple demanding responsibilities, including patient care, academic deadlines, and clinical documentation, developing strong organizational and prioritization skills

Medical Assistant – Georgia Pain and Wellness Center – Chamblee, GA

Aug 2018 – Dec 2018

Intern – Georgia Lions Lighthouse Foundation – Chamblee, GA

June 2018 – Aug 2018

ADDITIONAL EDUCATION

Doctor of Osteopathic Medicine – Philadelphia College of Osteopathic Medicine Jan 2024

Successfully passed COMLEX-USA Level 1 (National Board of Osteopathic Medical Examiners)

Master of Public Health – Mercer University

May 2019

Bachelor of Science – Mercer University

May 2017
